PROFESSIONAL SUMMARY

IT graduate with hands-on experience in cloud infrastructure (AWS, Azure, GCP) and DevOps, plus contributions to production systems at ApexLogic Technologies, including accounting, POS, inventory, distribution, and HR/payroll platforms for real clients. Certified in SQL, Python, IT fundamentals, and networking. Ready to contribute as a System Administrator, DevOps Engineer, CloudOps, Cloud Engineer, or QA Engineer.

EDUCATION

Far Eastern University - Institute of Technology, Manila, Philippines

BS in Information Technology, specialization in Business Analytics

February 2022 - September 2026

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, Networking, Security Groups), Microsoft Azure (Virtual Machines, Azure Cloud SQL)

Programming Languages: Python, Java, C++, PHP, JavaScript

Web Development: HTML, CSS, Laravel

Databases: MySQL, PostgreSQL

Server and Web Administration: Linux, Apache, Nginx, Tomcat

Networking and Security: TCP/IP, DNS, SSL, HTTP/HTTPS

Tools and Platforms: Jira, ServiceNow, PowerShell, Power BI, Figma

WORK EXPERIENCE

Cloud and DevOps Engineer - ApexLogic Technologies

Remote, Makati, Philippines | April 2026 - Present | Full-time Independent Contractor

Cloud Infrastructure and DevOps

- Provisioned and managed AWS EC2 instances and VPC networking, including subnets, security groups, and routing tables, to support hosting and connectivity for enterprise applications.
- Administered Azure Virtual Machines and Azure Cloud SQL databases, handling provisioning, scaling, backups, and performance monitoring for production workloads.
- Built and maintained CI/CD deployment pipelines and infrastructure monitoring/alerting across AWS and Azure environments to support reliable production releases.
- Provided production troubleshooting and client support, diagnosing and resolving cloud infrastructure and application-level incidents.

Product Development and Client Delivery

- Contributed to the development and deployment of a cloud-based Cooperative Accounting System for Bagulin Multipurpose Cooperative and Damayan at Tulungan sa Isa't-isa Multipurpose Cooperative (DTI MPC), covering member, loan, savings, and share capital management; accounting and financial reporting; dashboard analytics; and CDA/BIR compliance reporting.
- Contributed to the ApexLogic Distribution and Inventory Management System (DIMS), an enterprise platform covering production, warehouse operations, truck distribution, deliveries, collections, and accounts receivable through a real-time dashboard.
- Contributed to the ApexLogic Inventory Management System (IMS), supporting stock movement tracking, warehouse transfers, supplier management, and inventory valuation across multiple locations.
- Contributed to the ApexLogic Point of Sale (POS) System, supporting sales transactions, product and pricing management, payment processing, and integration with inventory and customer data.
- Contributed to the ApexLogic Human Resource Information System (HRIS) and Payroll Management System, covering employee records, attendance, leave management, payroll computation, and workforce deployment tracking.

- Developed the TripAlly PH travel consultancy website and supported automation workflows to strengthen digital presence, inquiry generation, and customer engagement.

Quality Assurance Intern - Ollopa Corporation

January 2026 - July 2026

- Conducted product research and created accurate product listings by gathering contact details, email addresses, and company profiles.
- Performed website quality checks evaluating responsiveness, functionality, and usability, and supported online presence through social media engagement and comment management.

ACADEMIC AND PERSONAL PROJECTS

Fabella Intranet OPD Queuing System - Backend Developer

- Designed and developed the core logic for a real-time patient queuing system using PHP, Laravel, and MySQL, hosted on Hostinger; created flow charts and activity diagrams for technical handover.

UI/UX Design for Internal HR Website - UI/UX Designer

- Designed high-fidelity UI/UX and interactive prototypes in Figma for an internal Human Resources web application.

Video Rental System - Backend Developer

- Developed backend business logic in PHP for managing inventory, customer accounts, and rental transaction processes.
